Comark Cloud Tour

The Functions Explained

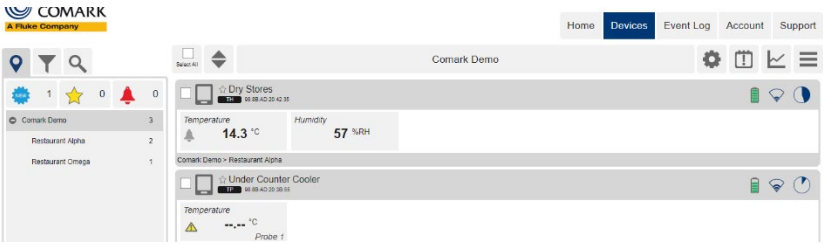

System Status: A quick view of the status of your devices. Selecting one of these allows you to explore more detail on the relevant devices.

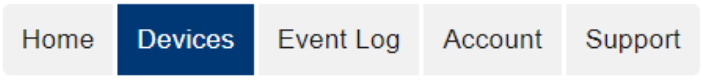

Unresolved Events: A list of the most recent events for your devices. Explore Events to see more details.

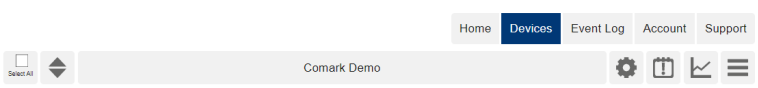

Favourites: A feature of Professional accounts, the favourites section gives full information about the devices you are most interested in. Set favourites from the Devices page by clicking on the star. They can then be viewed separately in the Favourites list by clicking the star icon.

Main Menu: Use the quick links to jump between your devices, event logs, account settings and more detailed help and support.

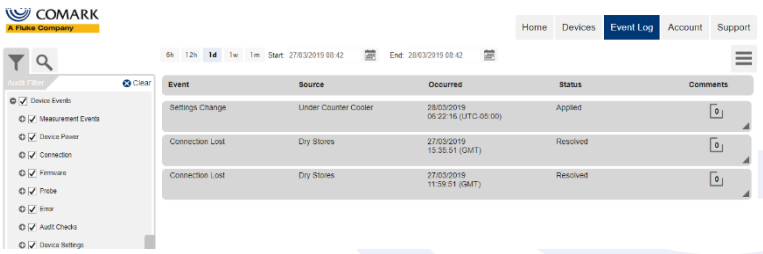

Devices: Navigate to Devices to view all of your devices, change the settings, view detailed events for specific devices, and see graphical data.

Comark Cloud Tour

The Functions Explained
